

Pole and Ground mount Systems

Multi-Pole Mounts (MPM)

- Designed to mount on 3" or 4" SCH 40/80 pipe (installer supplied)
- Fewer ground penetrations than traditional ground mount systems saving labor and materials
- Additional ground clearance – ideal for shade structures or car ports
- Full range of seasonal elevation adjustments
- Under-flange module clamp for easier installation and improved aesthetics

Top-of-Pole Mounts (TPM)

- Heavy gauge steel and aluminum construction
- Module specific designs reduces parts and assembly time
- Preset holes eliminate measuring and drilling
- Seasonal elevation adjustments from 15° to 65°
- Heavy duty stainless steel mounting hardware
- Mounts on standard Schedule 40 or 80 steel pipe

Side-of-Pole Mounts (SPM)

- Available in painted steel or mill-finish aluminum construction
- Mounting options include band clamps, u-bolts or through bolts
- Adjustable tilt angle
- Heavy duty stainless steel mounting hardware
- Tower mounting options available
