

## Telecoms Dead Ends

PREFORMED™ Telecomm Dead End is designed to terminate solid open wire at communications insulators or other pole fittings. The mechanical strength will equal or exceed the breaking strength of the communications wire.

### Product Characteristics

- Positive grip upon the wire
- Even distribution of clamping force along the length of the fitting
- Eliminates concentrated forces thus protecting the wire at termination point
- Fast, simple and uniform application
- Compatibility with the wire to which it is applied

### Application Note

Dead Ends should not be re-used after original installation

CATALOGUE NO	FOR USE ON WIRETYPE	SIZE	APPROX. LENGTH OF FITTING mm	COLOUR CODE
IDE I 20-G	GALV. WIRE	2.0 to 3.0	305	BROWN
IDE I 10-CW	COPPER COVERED STEEL	2.5 to 2.8	305	BROWN
