

Telecoms Suspender Clip

PERFORMED™ Suspender clips are designed for use on all types of messengered overhead cables.

It is a versatile one-piece unit for safe and easy use with UV resistant PVC covering in the loop area to protect the cable sheath against abrasion and chafe damage.

Made of galvanised steel wire, the helical configuration provides fast, easy installation on the galvanised steel stranded catenary without tools, and assures uniformity of installation along the line.

PERFORMED™ Suspender slips are applied typically at intervals of 500 mm.
