

Suspension Fittings

A full range of standard and special components are designed and manufactured in either malleable cast iron or forged steel. Suspension yoke plates are flame-cut steel and drilled to customers requirements.

All fittings are hot-dip galvanised to the SASS 763 specification.

Connectors conform dimensionally to SASS 178, with ball and socket dimensions being in accordance with IEC 120 requirements.

The following sketches represent some of the many fittings in our range.

Special designs are considered on application.
